

## The logo encapsulates a sense of growth, movement, nature and light

The O from Osidge is shown here as central to what we do. It is a representation of our school, the whole child, our community and the cycle of learning.

### **The Whole Child**

The colours here are stages of growth and learning; moving from the darkness into the light. The space in the middle is a space for creativity and exploration which we give the children through our broad and rich curriculum.

### **Community**

We are unified by our commitment to improving the children's opportunities.

The different blue colours represent humanity; we are each made up slightly differently. Collectively, by sharing and enjoying these unique qualities and by working together it strengthens us all and enriches our community.
