

'Why is Water Wet' and 'Growth & Change' Summer 1 Topics

This term, we will be stimulating children's curiosity, understanding, knowledge and imagination about water in its different forms in our topic 'Why is Water Wet?'; exploring creatures who live in and around water, why we need water to survive, where water comes from, the properties of water and the ways that water can move and change shape. We will also be learning about the world through our topic 'Growth & Change', learning about life cycles and sharing our very own 'All About Me' Boxes. Below are a list of key words and phrases that are related to our topics. We feel it is important for the children to have some understanding of the basic vocabulary before they begin the topic. In order to support your child's learning, we would like you to spend some time talking about the meaning and understanding of these words and phrases. We encourage parents to use their home language to talk about these words and phrases to help children understand these words, especially if another language is spoken at home.

Why is Water Wet?

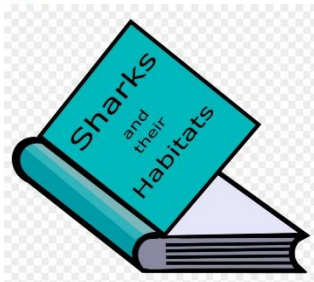

Predator/shark

Weather
