My phone would be charged when I walk. It would use the energy my body creates when walking. Niamh

4T

My phone would be integrated into my arm. It would be charged by energy produced by me eating food. Ariadni

What do you want technology to look like in 20 years?

What will it be able to do now that it couldn't do before?

How might it help make our lives better?

My phone would be made of materials that are so sturdy it never cracks. It could be made of see through metal, not plastic, to be good for the environment. Ibrahim

Our future technology designs...

I want phones to be smaller because if you are at work then it is easier to carry around (Derin)

4B

Phones could automatically translate different languages so that you can talk to your friends in other languages (Alex)

What do you want technology to look like in 20 years?

How will we keep it safe?

How might it help make our lives better?

When you are playing a game, you can talk to it to give it instructions (Sean)
You could make it only respond to your hand to keep it safe (Areen)

I would make it so that a phone would automatically take a picture if you touch the back. It only works if you have the camera app open (Taliyah)

You could do shopping and other jobs just by talking to your phone (Jibreel) To make it safe, it would ask you a question which only you know the answer to (Nicole)

Our future technology designs...

I would make headphones. When you click 'public' it plays out loud and when you click 'private' it plays through your ears. You can also select VR to see the singer performing (Nicole) You could make it finger/thumbprint access only (Sean)

Your friend adds you to a new group chat but you don't know anyone else in the group. Someone asks you, "What school do you go to? Where do you live?"

5M

- We should never share personal information about ourselves online with people we do not know (Nicolas)
- Group chats can escalate negative comments - people join in and add to the unkind comments (Meryem)

- I think was intended to be positive; some young children may misunderstand and think it's an excuse for poor behaviour choices (Muna)
- This is positive because people should love themselves and feel confident about who they are and not feel the need to change (Dasia)

A video creator you like posts online that we should all love ourselves for who we are.

Changes in technology can be positive and negative.

Positive:

- Better quality information/ speed/ technology/ audio/ visual (Saoirse)
- Communication with others globally (Myla)
- Can help you find your way home/ you can be found with a tracker (Leo)

Negative:

- You become obsessed with your phone/ device (Dylan)
- Less time being physically active, seeing your friends/ family in real life (rather than online) (Hanife)
- Other people get jealous/ people show off (Surie)
- More opportunities for hacking (money taken, personal information taken) (Zeynep)

How does the internet influence us?

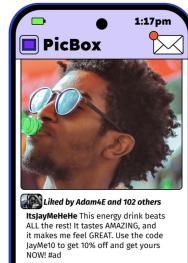

5R

Sometimes it influences us positively and sometimes it influences us negatively. - Zeynep

If people saying bad things about others online, that is negative. - King

Positive

Dangerous challenges online could affect your health and you could get hurt really badly. - Tiana

Negative

A good influence would be a youtube video of someone reading your favourite book. - Matteo

If a video is tells you to do things like drink a lot of energy drinks that would be a negative influence. - Meryem

Not sure

It depends

WHAT IMPACT COULD THIS HAVE ON SOMEONE YOUR AGE?

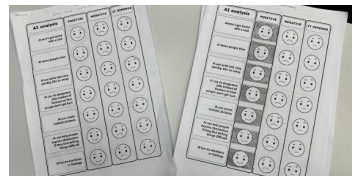

WHAT ADVICE WOULD YOU GIVE TO HELP THEM?

Year 6 planned and presented pros and cons about Artificial Intelligence, discussing whether it makes the world a better place or not.

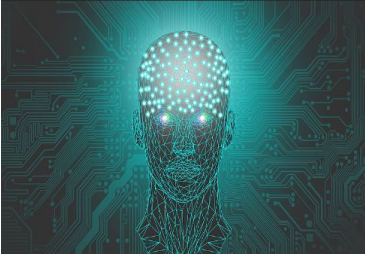

How AI works

AI is basically robots but on devices and cars and it responds way faster than humans!

What is AI ?

AI stands for artificial intelligence, it is a (for example) a machine that can think like a human and perform tasks .

Some examples include alexa, automatic cars , robot vacuum cleaners and computer systems such as chat gpt.

Pros / cons

Pros of AI

- Some useful thing like timers / clock / games
- Information /and ideas /food calling family
- And Friends music /songs

Cons of AI

- AI can be used to cheat on your Homework.
- AI is stealing peoples jobs, because Ai can do some jobs better than People.
- AI has no creativity because it can Only come up with things that Already exist online

- 3  Pros and Cons of AI
- 4  AI in the Future

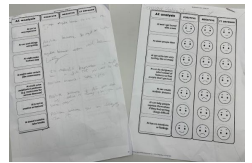

What is AI?

AI (short for artificial intelligence) is a computer that uses information do things like write essays, generate images, recommend you adverts, and more. In this presentation you will find the pros and cons of AI.

Is Alexa a weak AI?

Over the last few years, we've often talked about how we're living in a golden age of artificial intelligence (AI). Ideas that seemed like science fiction not so long ago are now a reality and there's no better example of that than Alexa.

Year 6 planned and presented pros and cons about Artificial Intelligence, discussing whether it makes the world a better place or not.

GOOD SIDE

The good part about have AI is that we don't have to do complicated tasks like for example: a very difficult math problem. AI is very helpful in some cases like directing a plane while the pilot is sleeping.

AI OR NOT

AND THE REASONS WHY

THE PROS AND CONS

<p>Pros</p> <p>Pro1-Ai gets things done quicker than a human.</p> <p>Pro2-Ai can help people express themselves if they find writing difficult.</p> <p>Pro3-Ai can help give you ideas on things if you are stuck.</p> <p>Pro4-Ai can help you with spelling mistakes.</p> <p>Pro5-Ai can be a friend to you in a robot form.</p>	<p>Cons</p> <p>Con1-If Ai was in a robot form, and was developed to have emotions, then it might start asking questions and turn on humans.</p> <p>Con2-Ai's main weakness is water and when they touch it, fire may occur which is dangerous.</p> <p>Con3-Ai can be extremely expensive.</p> <p>Con4-Ai can make humans lazy.</p> <p>Con5-Ai can cause to people lose their jobs because it can do work for them.</p>

CONCLUSION

In conclusion it is very good to have AI but humans get too lazy and robots do everything . A robot could malfunction so it depends on your opinions.
