

**JUST ONE Tree Day**

***<https://www.justonetree.life/>***

Friday 17th October 2025

# Ladybirds

***“Some animals live in trees like owls”***

***“We have to plant more trees because they give us air”***

***“Birds build their nests in trees and badgers live underneath trees”***

***“Trees give us oxygen to breathe”***

***“The leaves fall off in Autumn time”***

***“Evergreen is always green. The leaves don't fall off”***

***“We want to plant more trees because they are special”***

***“Trees are in the woods. Woods have so many trees”***

***“Sometimes even food grows on trees like berries”***

***“They are 100 years old”***

**“Trees give us oxygen to breath”**

**“Trees give us the shade when it’s very hot”**

**“People build houses from wood and it comes from trees”**

## Dragonflies

**“Animals live on the trees like birds and squirrels and we need to protect them”**

**“We get food from trees, apples and oranges”**

**“Trees make food for the animals”**

1F

"It is not good for trees to be cut down because the animals need a home!" Sienna

"Trees give us air to breathe" Chisom

"Trees give us fruits and fruits are good for our bodies" Ares

"Trees give us shade when it is hot" Eliseo

"Evergreen means that the leaves don't fall off!" Serwan

"Trees are good for the animals because it gives them food" Ivy

"I have a yellow leaf!"  
Daniela

1S

"I felt the wax on a yew tree before."  
Arthur

"Look after the trees because animals live there."  
Deniz C.

"This is an evergreen tree. The leaves don't fall off in the winter."  
Harper-Grace

"Look at the birds nest on the tree!"  
Daniel

Habitat means where the animals live."  
Jian

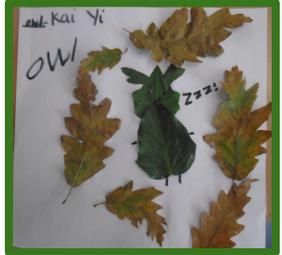

2L

"Trees are important because they give us oxygen and there are lots of different habitats in trees." Zara

" We made creatures that live in trees out of leaves and sticks, like owls and woodpeckers." Philip

"Just One Tree charity plant a seed that grows like the circle of life." Joshua

"Trees are important because they clear our air and if people chop them down, animals will suffer." Nylah

'We collected different colour leaves like brown, green, yellow, red and orange from the trees' Besa

2B

'I wore green because it is Just One Tree Day and that means I have donated £1 to help plant a tree' Tristan

'Lots of animals live in a tree so we need to protect the trees' Luciano

'I created a bird out of leaves with moving feathers' Leon

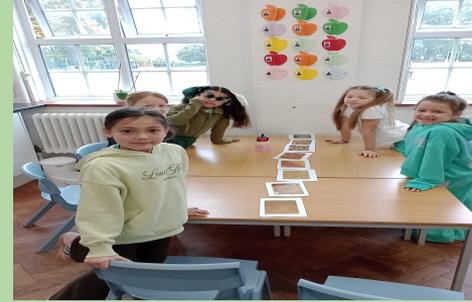

'I made a hedgehog and caterpillar made out of leaves' Xavier

31

If we count the rings on a tree trunk we know how old is the tree. Isabelle

The colours of the rings can show us if the tree grew up in bad conditions. Niaz

Dendrochronology means how old is a tree. Caspar

Today I learn that if the rings are thick the tree grew up in a warm and wet country. Bella

3R

To celebrate One Tree Day, Year 3 explored the fascinating science of dendrochronology — the study of tree rings!

The children investigated how we can tell a tree's age by counting its rings and learned that the size and pattern of the rings can tell us about the climate conditions the tree has lived through!

# Just One Tree Day

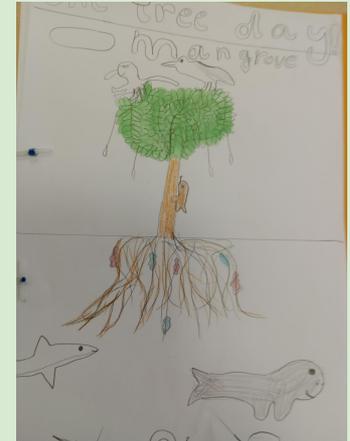

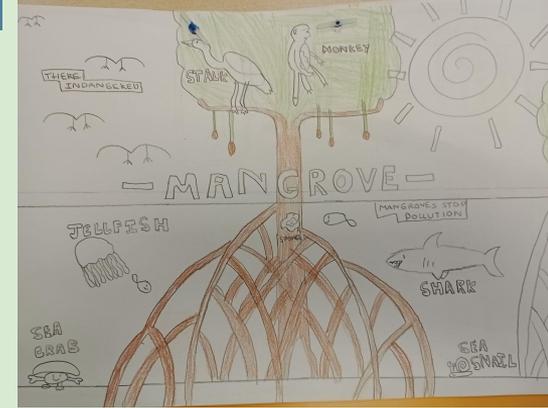

Mangroves are one of our planets most threatened wetland ecosystems.

There are a range of diverse and interesting wildlife which live in the Mangroves areas. Such as the proboscis monkey, dugong and jellyfish.

The mangroves intricate root system traps pollutants before they can reach the ocean. This helps to protect delicate marine ecosystems, such as coral reefs.

Mangroves.

The wetlands that we are learned about today are called mangroves. They are found all over the world in tropical or subtropical climates and are usually along the coast, where the ocean meets the land.
